### Professional

## How it works?

The app uses **Artificial Intelligence (AI)** to calculate the odds, make predictions, and suggest moves with the highest chance of winning.

As soon as the calculations are done, **PokerGrandpa** transmits hints while you are playing in poker rooms. You enter the game using our improved app for poker rooms. Works with these famous poker rooms: **PPPoker, PokerBros, UPoker**, which are all available for US-based players.

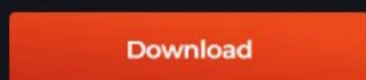

You will see hints pop-up live in the poker room interface, and by following them, you are assured of winning. No in-depth poker knowledge is required.
