Customer Quotes

Maya Thompson
Owner of an online jewelry store

CustomBooks is a game changer! I run a small online jewelry store, and I used to juggle three different tools — one for accounting, one for inventory, and another for taxes. Now everything is in one place. It saves me time, money, and stress. The interface is super intuitive — I was able to set it up without needing a bookkeeper.

Matt Walker
eCommerce entrepreneur

I manage stores on Shopify and Amazon, and CustomBooks became the backbone of my business. Automated inventory tracking, accurate tax reports, and clear analytics — all of it helps me make decisions faster. No more number confusion — now I feel completely in control of my finances.

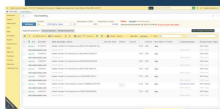

CustomBooks is a game changer! As a financial platform and bookkeeping app — e-reports and recommendations.
